

Automating and Productionizing Machine Learning Pipelines for Real-Time Scoring

David Crespi, Data Scientist
Jared Piedt, Software Engineer

What we do

- Digital consumer choice platform
- Connect online customers with products and services across high-growth industries:
 - Home services
 - Financial services
 - Healthcare

A really smart move.

How does data science add value?

Product recommendation

Real-Time Predictions

Requirements

- 1 Speed
- 2 Consistency

Data Science Process

- 1 Data Collection
- 2 Machine Learning Pipelines
- 3 Model Deployment

Data Science Process

- 1 Data Collection
- 2 Machine Learning Pipelines
- 3 Model Deployment

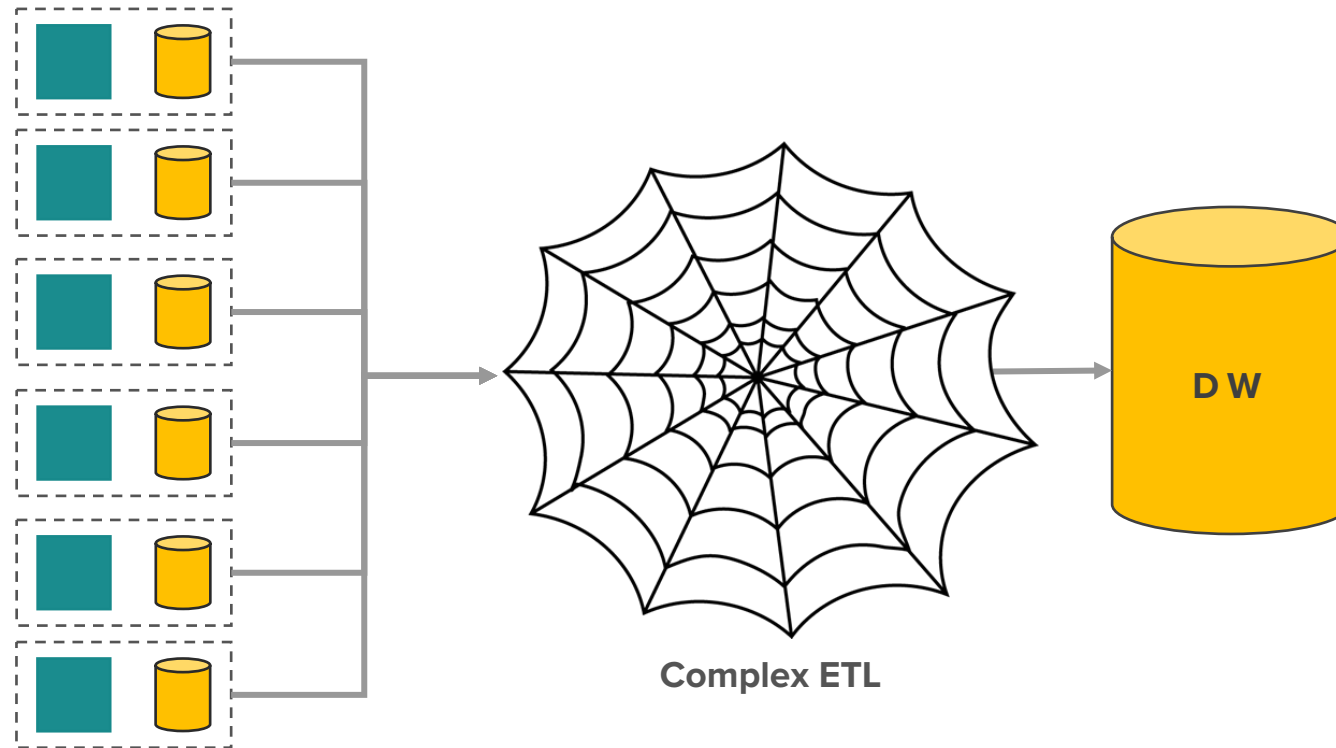

Old Data Architecture

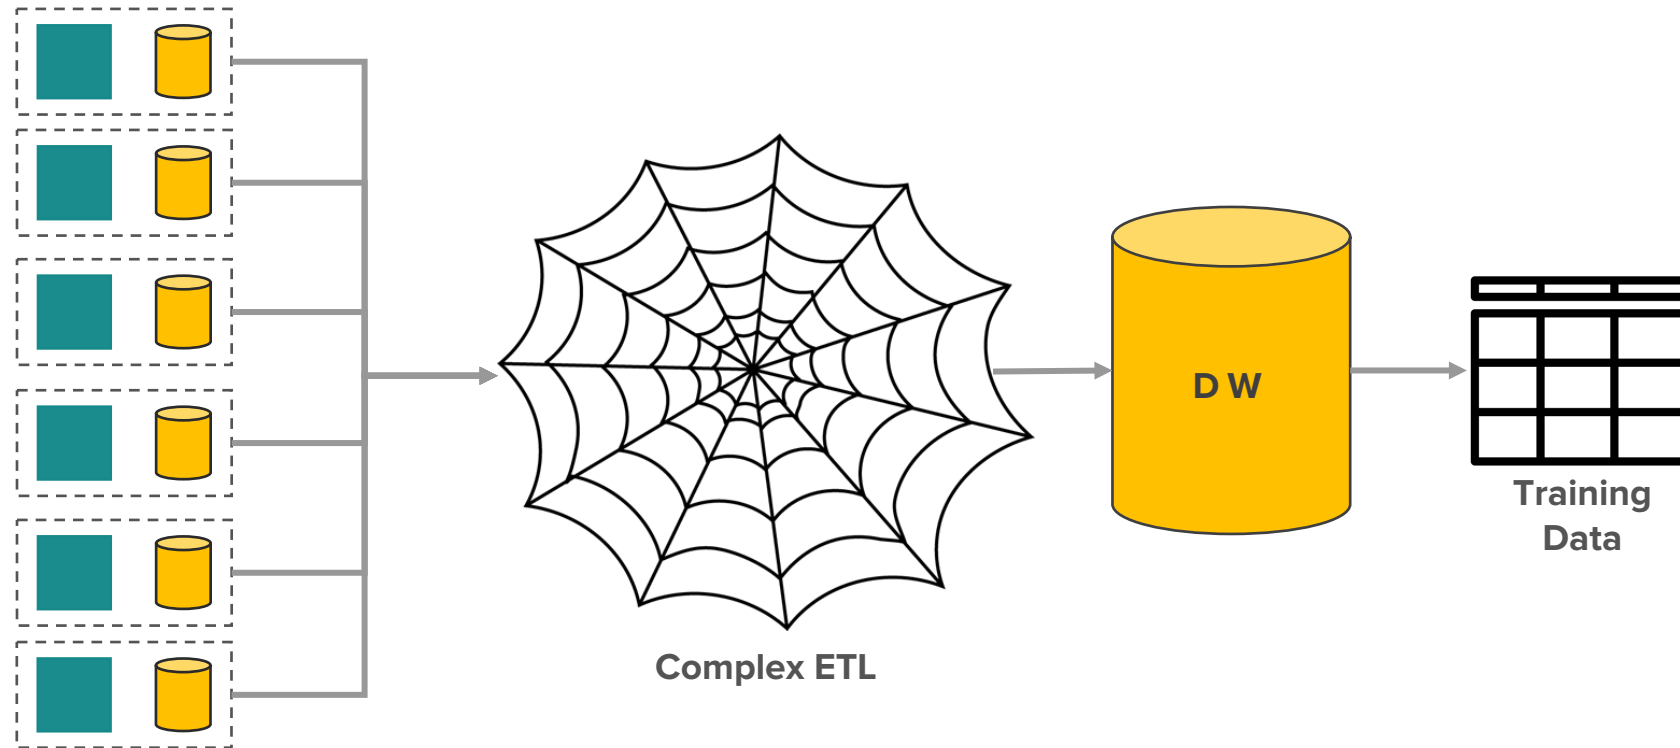

Old Data Architecture

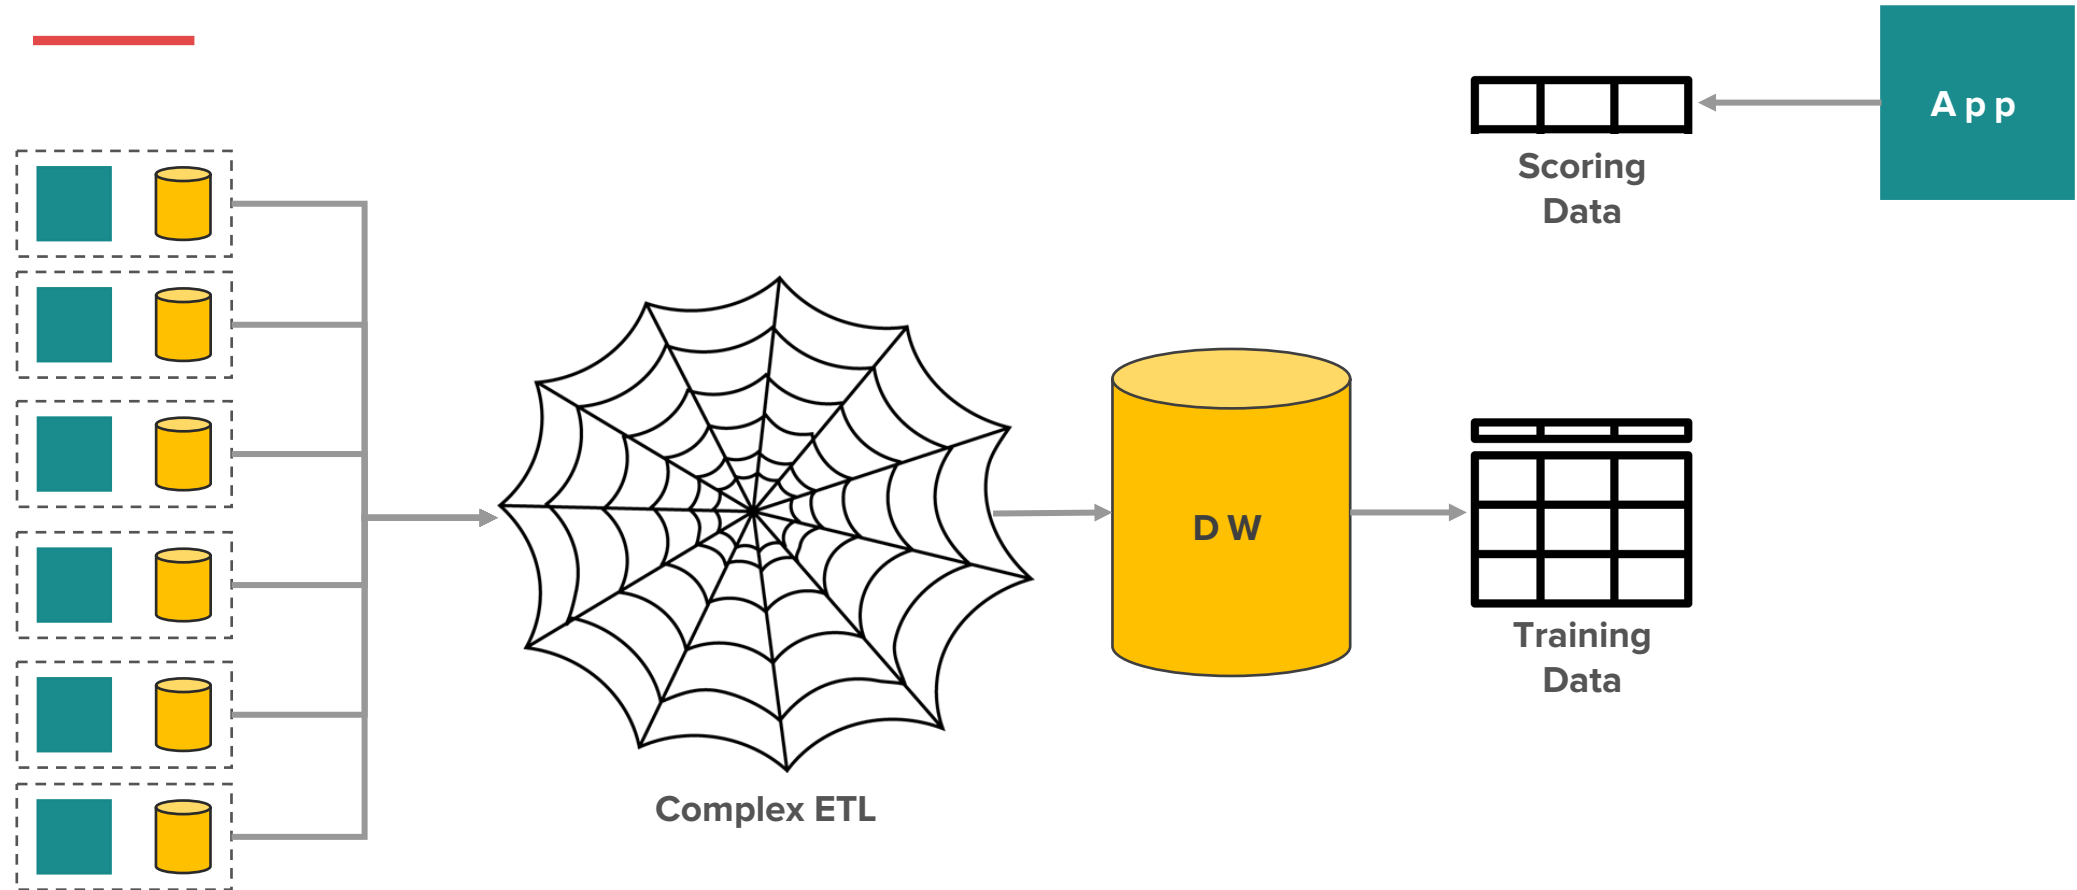

Old Data Architecture

Old Data Architecture

Old Data Architecture

Pain Points

- Duplication of business logic
- Data drift

Goals

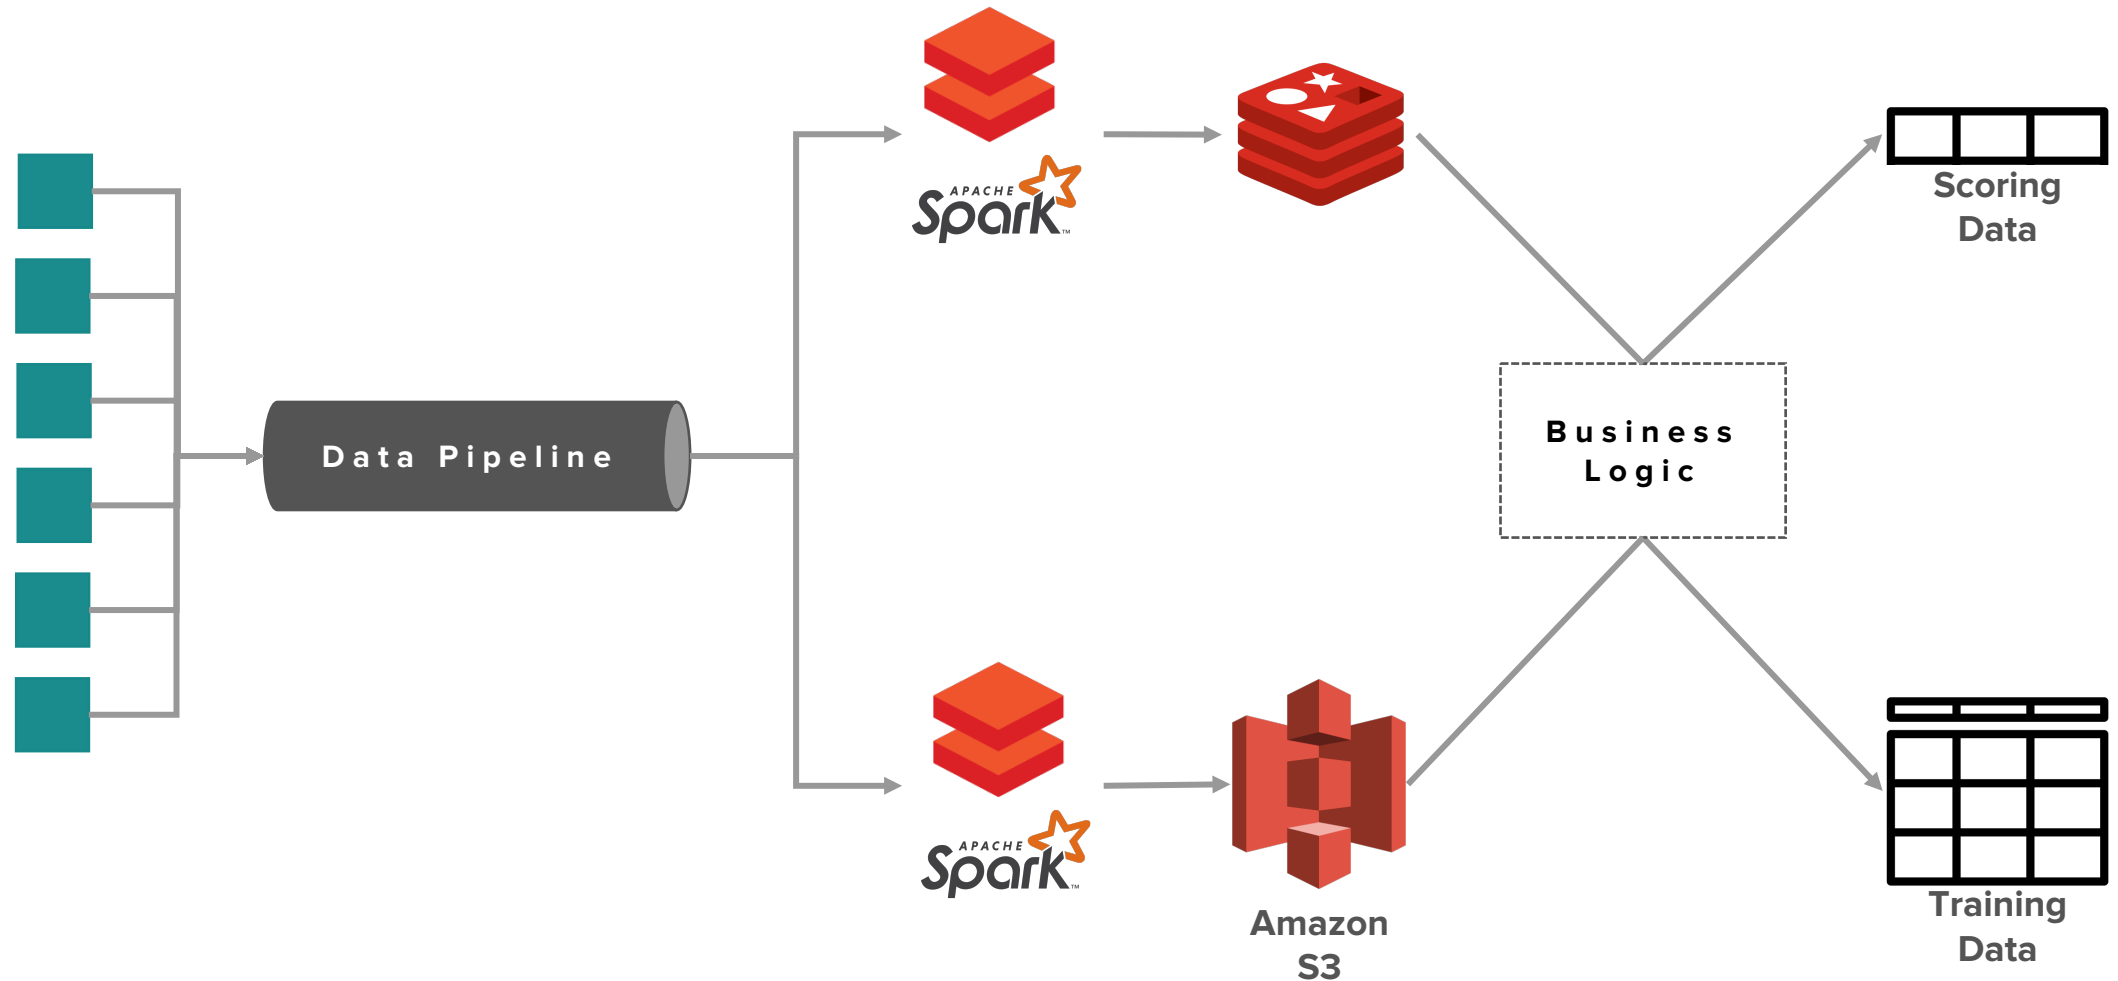

- 1 Immutable data
- 2 Write business logic once
- 3 Make data available in real-time

Event-Driven Architecture

New Data Architecture

Projections

Credit Card Recommendation

User Id	Keyword	Page View Count	Card Shown	Clicked
a	best travel cards	2	Travel	1
b	credit cards	3	Cash Back	0
c	top credit cards	1	Cash Back	1
d	credit cards	1	Travel	0
